1. I have talked with Mr. Sprankle, of the staff of the House Appropriations Committee regarding his request to see CIA machinery, and he tells me that Mr. Brown, of the GAO, had spoken to him regarding some machinery developed at CIA using the television principle. It was that machine which Sprankle wished to see. From this discussion it is my belief that what he is talking about is the Intellifax, but Mr. of the Comptroller's Office, is checking back with Brown to ascertain what it is that he discussed with Sprankle.
